2015 Meeting Corporate Supporters will be updated on SAGES website
Dear Colleagues:

On behalf of SAGES and the Program Committee, we would like to invite you to attend the 2015 SAGES Annual Meeting in Nashville, TN, Music City, USA.

This year’s Annual SAGES Meeting will be held at the Gaylord Opryland Hotel and Convention Center (part of the Marriott portfolio of brands), April 15-18 and will continue a long-standing tradition of strong didactic sessions by world-renowned experts, combined with exploration of innovative technology in the broad spectrum of general surgery. Our international participation, which last year included surgeons from 69 countries, continues to increase, demonstrating the importance of this meeting around the world. A variety of topics will be covered that includes sessions on foregut, colorectal, abdominal wall, bariatric and oncologic surgery. Highlights include: seven postgraduate (PG) courses (including novel PG courses in robotic hepatobiliary surgery, the Fundamental Use of Surgical Energy, and career development); and panel sessions on lessons learned in 25 years of laparoscopic cholecystectomy and endolumenal management of GI surgery complications. This year’s meeting is joint with IPEG and Military Surgical Symposium and will highlight approaches to GI disease in a pediatric and adolescent population.

The program for the 2015 meeting focuses on relevant clinical problems that busy surgeons encounter every day in their respective practices, including management of complications, approaches for reoperative surgery, and laparoscopy in the acute care setting. New this year are sessions geared to surgeons in community or hospital based practice with information designed to be readily adopted into your daily practice. Sessions are structured to provide self-assessment CME credits, fulfilling Part 2 of the American Board of Surgery Maintenance of Certification (MOC) program.

As with all SAGES technology-friendly meetings, the conference features electronic media to allow you to personalize your experience. A SAGES Meeting App will provide access to meeting content via your handheld devices, and e-mails and tweets during the meeting will keep attendees informed of upcoming and on-going informative and exciting events. We encourage you to bring your family as day care opportunities will be available for all children. The entire family is encouraged to volunteer for one of our community service events.

Of course, no SAGES meeting would be complete without the Friday night Main Event and Sing-off. We are in Music City after all and promise to have a great evening of live music, great food and fun at the Wildhorse Saloon, a landmark Nashville venue.

Specific program highlights include:

- Hands-on courses
- All Things Hernia
- Minimal Access Surgery Tricks
- Techniques, and Endoscopic Management of Complications
- Practice, Career, and Life-Changing courses
- Evidence-Based Perioperative Care
- Lessons from Around the World
- Career Development Symposium
- Advocacy Luncheon
- Practice Building Session and mock trial
- Didactic courses and panels co-sponsored with groups from across the Americas, Europe, and Asia; joint sessions with AAST, IPEG, SSAT, and The Joint Armed Forces
- Numerous panels, symposia, video & scientific sessions
- New video shorts to provide more information in less time
- The SAGES Presidential Debates, MIS Jeopardy, and New Ted-X Style talks
- Patient Safety issues identified and highlighted throughout the program (cholecystectomy, FUSE, and SAGES SMART enhanced recovery)
- Part 2 Self-Assessment MOC compliant sessions
- FLS, FES and FUSE testing opportunities
- Learning Center with new simulators & simulation scenarios
- Top Gun, and SAGES Mini Medical School for high school students
- An Exhibit Hall that showcases the latest equipment & instruments
- Fabulous social events

If you go to just one surgical meeting in 2015, this is the one! We look forward to seeing you in April.

Aurora Pryor, MD
Program Chair

Mike Holzman, MD, MPH
Program Co-Chair

L. Michael Brunt, MD

General Information

Surgical Spring Week

Location
Gaylord Opryland Hotel & Convention Center (part of the Marriott portfolio of brands)
2800 Opryland Dr
Nashville, TN 37214

Hosted By
Society of American Gastrointestinal and Endoscopic Surgeons (SAGES)
11300 W. Olympic Blvd., Suite 600
Los Angeles, CA 90064
Phone: 310-437-0544
Fax: 310-437-0585
Email: sagesweb@sages.org
Web: www.sages.org
Twitter: @SAGES_Updates

Registration
11300 W. Olympic Blvd., Suite 600
Los Angeles, CA 90064
Phone: 310-437-0544, ext. 128
Fax: 310-437-0585
Email: registration@sages.org

How do I register?
Register on-line!
www.sages.org/registration/

Please register prior to the early registration deadline of March 6, 2015.

Who Should Attend:
The SAGES Annual Meeting has elements that have been specifically designed to meet the needs of practicing surgeons, surgeons-in-training, GI assistants, nurses and other allied health professionals who are interested in minimally invasive surgery and gastrointestinal endoscopy. Thorough coverage of traditional topics and presentations of "cutting edge" material can be found in this program. The SAGES Program Committee recommends that participants design their own attendance schedule based on their own personal educational objectives.

Exhibit Only Registration
For those participants only interested in attending the technical exhibits, we will offer a special Exhibits Only Pass. This option will only be available on-site. You may register for an Exhibits Only Pass beginning the morning of Wednesday, April 15, 2015.

For additional information, please contact the Registrar (310) 437-0544 ext. 128.

SAGES Registration Hours

Tuesday, April 14, 2015
12:00 PM - 5:00 PM

Wednesday, April 15, 2015
6:30 AM - 6:30 PM

Thursday, April 16, 2015
6:30 AM - 5:30 PM

Friday, April 17, 2015
6:30 AM - 5:30 PM

Saturday, April 18, 2015
7:00 AM - 2:00 PM

Exhibits Dates & Hours –
NEW WEDNESDAY AND SATURDAY HOURS!

Wednesday, April 15: Exhibit Hours 12:00 pm - 3:30 pm
Wednesday, April 15: Opening Reception 5:30 pm - 7:30 pm
Thursday, April 16: Exhibit Hours 9:30 am - 4:00 pm
Friday, April 17: Exhibit Hours 9:30 am - 4:00 pm
Saturday, April 18: Exhibit Hours CLOSED

Exhibits will take place in Ryman Exhibit Hall C.

The SAGES Meeting has different registration options & pricing.
See pages 69 - 70 for details.

Try the SuperPass for best value!
Register on-line at www.sages.org by the March 6, 2015 early deadline!

IPEG Meeting will meet concurrent to SAGES in Nashville.
Attend the IPEG Scientific Session for only $150. See page 66 for their program outline. Check the appropriate box on the registration form for entrance.

What Is The Military Surgical Symposium?
The Military Surgical Symposium will meet again concurrent to SAGES in Nashville. The military symposium will include all the military services (note this is not an official Department of Defense event) and will be part of the scientific and clinical sessions of the annual SAGES conference. Registration for both the SAGES conference and military symposium will be free to military personnel currently on active duty. Contact the registrar for the registration form. See pages 27 and 41 for their program outline.

VISA Information for International Attendees
For more than 50 years, the United States of America has required visas to be issued to those wishing to study, visit, or conduct business in the U.S. While changes have been made recently to U.S. visa law, many procedures remain the same. Most importantly, you must APPLY EARLY for a visa, as processing time has increased in some instances. For information about obtaining a visa, please visit the following website: http://www.unitedstatesvisas.gov
If you need a written invitation to assist you with your visa, please email the SAGES Registrar, registration@sages.org, with your name and complete mailing address for each request.

Airport/Travel Information:
The Gaylord Opryland Hotel & Convention Center and surrounding hotels are approximately 15 minutes from the Nashville International Airport (BNA). Transportation from the airport to the hotels is available via taxi, shuttle service, or car rental. Gaylord Opryland offers daily roundtrip shuttle service from the airport to the hotel. Look for the Gaylord Opryland Welcome Desk on the lower level of the airport between the two escalators. An agent can assist with your travel needs and ticket purchase, or use our kiosk by the welcome desk.
SAGES

Humanity, Education, Leadership, Perspective, Support

SAGES will be involved in volunteer projects to help support the Nashville, Tennessee community. This is an excellent way for members and guests to give back to our host communities.

This year’s initiatives:

Renewal House is Nashville's first, largest and most comprehensive family-centered recovery community for women and children. Come out and help host the “Celebrating Families” luncheon. SAGES will provide wish list gifts to families. Transportation is provided from the Gaylord Opryland Hotel to and from the site. Please dress comfortably.

Register online or stop by Registration Desk to Signup

Thursday, April 16: 10:30PM - 12:30PM
Pickup time & location TBD
Cost: No fee

The Nashville Rescue Mission offers food, clothing and shelter to homeless families. Join us as we volunteer to serve a nutritious lunch to women and children staying at the Women’s campus. SAGES will provide wish list gifts to the Family Gift Center.

Please register promptly as we are limited to a maximum capacity of 15 volunteers at the campus. Volunteers must be at least 10 years old to participate. Transportation will be provided from the Gaylord Opryland Hotel to and from the site. Please dress comfortably and wear closed toed shoes.

Friday, April 17: 10:30AM - 12:30PM
Pickup time & location TBD
Limitations: Volunteers must be at least 10 years old
Cost: No fee

Mini-Med School Boot Camp

High school students from the Nashville area and SAGES membership will have the opportunity to experience the wonderful world of medicine and minimally invasive surgery. The day is power packed with classroom lectures, and Interactive Stations Experience. Both cognitive and skill competitions with awards and prizes will be offered. See page 50 for further details.

Saturday, April 18: 8:00AM - 1:00PM
Limitation: Must be a High School Student
Lunch Provided
Cost: No fee

SAGES Recognition of Excellence Award

Log onto SAGESPAGES to learn To Whom, From Whom and Why. SAGES will announce recipients of the 2015 SAGES Recognition of Excellence Coin onsite daily.

www.sages.org/sagespages

Save the Date!

• SAGES Scientific Session & Postgraduate Course
  March 16 - 19, 2016, Boston, MA
• SAGES Scientific Session & Postgraduate Course
  March 22 - 25, 2017, Houston TX
While you’re attending meetings, your children can enjoy their own Convention Camp, organized by ACCENT on Children’s Arrangements, Inc., a national company specializing in children’s activities. Camp SAGES is a complete morning to early evening entertainment program packed with activities for children ages 6 months* to 16 years. *All children must be pre-registered to ensure proper staffing levels. Children participate in age-appropriate activities, including arts and crafts projects and active games, in a safe, nurturing, and educational environment.

The high ratio of caregiver to child (1:2 for children 6 months - 12 months, 1:3 for children 13 months-2 years, 1:5 for children 3-5 years, and 1:8 for children 6 - 16 years) ensures campers receive lots of personal attention.

Available hours:
The Camp SAGES will take place at the Gaylord Opryland Hotel (Host and Meeting Location Hotel)
Wed - Fri, April 15 - 17: 7am - 6pm
Saturday, April 18: 7:30am - 2:30pm
Fee: $12/hour with 3 hours minimum.
Non-refundable pre-registration fee is $25

Advance registration is available at sages2015.org/childcare
Non-refundable pre-registration fee is $25

Each session has been assigned a relevant Learning Theme(s) and appropriate Guideline(s) will be referenced. Look for more information in Final Program and/or the SAGES 2015 Meeting App.

Attention Medical Students!
SAGES is sponsoring 3 Scholarships available for medical students to travel to the SAGES meeting (up to $2K each). For details and to apply, visit sages2015.org/scholarship

Check the SAGES website and 2015 Meeting App frequently for SAGES Foundation and/or Industry events (not planned nor accredited for CME by SAGES) which may have been added after this program was printed.

SAGES will be using the SAGES 2015 Meeting App to handle Audience Response, Questions From the Floor, and General Meeting Announcements.
If you wish to participate, please be sure to have an iOS and/or Android device, the SAGES 2015 Meeting App, and create an account for use inside the App.
Please contact webmaster@sages.org if you have questions or need advice.

Patient Safety
Look for the connotation throughout the meeting program to easily identify focused sessions and specific lectures highlighting patient safety issues.
SAGES 2015 Schedule at a Glance

(as of Oct. 2014)

Promoting a Universal Culture of Innovation, Safety and Improved Outcomes in GI Surgery

Program Chair: Aurora Dawn Pryor, MD; Co-Chair: Michael D. Holzman, MD, MPH

Oral & Video Sessions will take place throughout the SAGES Scientific Session. The exact program will be determined in November 2014.

Wednesday, April 15, 2015

SAGES Scientific Sessions
Postgraduate Course: Current Common Dilemmas in Colorectal Surgery
Half-Day Postgraduate Course: Advances in Foregut Surgery
Half-Day Postgraduate Course: The Recurrent Hernia - Strategies for Success
Half-Day Postgraduate Course: Endolumenal Management of Complications
Career Development Seminar
Panel: Lessons Learned from Around the World (joint with EAES)
Panel: Perioperative Care – Evidence Based Practice in 2015
SAGES Foundation Awards Luncheon 12:00pm - 1:30pm
Exhibits/Posters  open 12:00pm - 3:30pm
Half-Day Postgraduate Course: Bariatric Revisions from Historical Operations
Half-Day Hands-On Course: Endoscopic Management of Complications
Half-Day Hands-On Course: Career Breakouts
Debate: Inguinal Hernia Debates
Panel: Colorectal Strategies to Minimize the Impact of Surgery
Panel: Technology Innovation from Overseas (Program of the Americas)
Panel: Endocrine Surgery - Balancing Innovation and Quality
Panel: GI Cancer Management (joint with KSELS)
Panel: Innovation in the US - The Future of Surgical Innovation
Opening Session - History Movie

Exhibits Opening Welcome Reception 5:30pm - 7:30pm

Thursday, April 16, 2015

SAGES Scientific Sessions
Exhibits/Posters/Learning Center  open 9:30am - 4:00pm
Full-Day Military Surgical Symposium
Postgraduate Course: Updates in Abdominal Wall Management - Mesh Theory, Tissue Use, Complex Locations
Postgraduate Course: FUSE™ - Preparation/Refresher Course Symposium: Minimal Access - Lessons from NOTES and Single Site Surgery
Panel: Complex and Unusual Esophageal Disorders (joint with SSAT)
Humanitarian Lecture – Horacio Asbun, MD
Karl Storz Lecture “No Shortcuts to the Top-Climbing the World’s Highest Peaks” – Ed Viesturs (non-CME)
Educator’s Luncheon “Milestones, Metrics, and Mastery – Focus on Surgical Trainee Education and Assessment”
Free Lunch in the Exhibit Hall for All Attendees
Postgraduate Course: HPR / Robotics - Current State of MIS Hepatopancreato-biliary Surgery
Half-Day Hands-On Course: All Things Hernia
Half-Day Hands-On Course: Minimal Access Tricks and Techniques
Panel: Management of Unusual and Complex Cases (joint with JSES)
Panel: SAGES Talks
Panel: The Science Behind Diabetes Therapy - Surgery, Medical Updates and Mechanisms
Refreshment Break/ Happy ½ Hour in Exhibit Hall
Panel: Avoiding Bile Duct Injury and Other Untoward Outcomes - Optimizing Your Approach to Cholecystectomy
Panel: Open to MIS - What is Taking Us So Long?
Panel: Adolescent Bariatric Surgery - What Every Surgeon Should Know (joint with IPEG)
Industry Educational Events

Friday, April 17, 2015

SAGES Scientific Sessions
Exhibits/Posters/Learning Center  open 9:30am - 4:00pm
Mock Trial: See you in Court - Legal Consequences of Bile Duct Injury during Laparoscopic Cholecystectomy
Panel: MIS Jeopardy
Debate: Adolescent Achalasia - The Great Debate (joint with IPEG)
Presidential Address “SAGES Magical Mystery Tour” – L. Michael Brunt, MD
Gerald Marks Lecture – Frank R. Lewis, MD
Debate: Presidential Debates
Military Surgical Symposium
Fellowship Council Luncheon  “The Future of Fellowships in a 4 + 2 General Surgery Residency Model”
Free Lunch in the Exhibit Hall for All Meeting Attendees
Panel: Acute Care Session - Maximizing Patient Care in Emergency General Surgery (joint with AAST)
Symposium: SAGES SMART™ Program
Refreshment Break/ Happy ½ Hour in Exhibit Hall
Session: Emerging Technology (non-CME)
Panel: Avoiding Bile Duct Injury and Other Untoward Outcomes - Optimizing Your Approach to Cholecystectomy
Panel: Open to MIS - What is Taking Us So Long?
Panel: Adolescent Bariatric Surgery - What Every Surgeon Should Know (joint with IPEG)
Panel: Building and Optimizing A Surgical Practice
Panel: Quality Practices in Surgical Education and Training

Saturday, April 18, 2015

Exhibits, Posters, Learning Center  CLOSED
SAGES Scientific Sessions
Panel: Simulation and Telerobotics - Partnering with the Military
Session: Video Shorts (Top Videos)
Advocacy Luncheon “Advocacy Boot Camp”
Session: Top 21 Video - Expecting the Unexpected
Panel: Building and Optimizing A Surgical Practice
Panel: Quality Practices in Surgical Education and Training

What’s New in the Exhibit Hall?

There are more reasons than ever to visit the exhibit hall! In addition to the latest and greatest products and technologies, you will find:

- **New Wednesday Hours** – Added 12:00pm - 3:30pm
- **SAGES Cafe and Theatre** – pick up lunch or a snack, and enjoy the new “Video Shorts” sessions every afternoon
- **Happy (Half) Hour** – join exhibitors for a beer and a snack before heading back to the sessions! Or, grab a cup of coffee and visit the exhibits during the morning break.
- **Exhibit Hall Oasis/Charging Station** – stop in for a break while charging phones, computers and tablets, or check email at the internet station.
- **Exhibits will be closed on Saturday** – please plan accordingly

Unique Features of the 2015 SAGES Meeting

- Business Casual attire – Ties are optional or you can purchase one in our onsite SAGES store.
- Learn essentials of minimally invasive and open general surgery including updates in hernia, biliary, foregut, endocrine, bariatric, colorectal and oncologic surgery.
- Attend comprehensive postgraduate courses including new programs covering endolumenal management of complications, career development, bariatric revisions, robotics and FUSE amongst others.
- Enjoy a Collaborative Conference with our Joint Armed Forces colleagues and IPEG
- Heckle previous Presidents as they debate current topics
- **Enjoy the New * VIDEO SHORTS *
- Check out your medical colleagues’ “fund of knowledge” at the MIS Jeopardy session
- Relax at the Exhibit Hall Oasis for informal gatherings and re-charge your electronic devices!
- Gala and Sing-Off at World famous Wildhorse Saloon
- iOS + Android App!
- Bring the family. Child care, mini med school for high school students; and Top Gun for Kids
- Come before the meeting starts or stay a couple days after the meeting to enjoy all that Music City USA has to offer

SAGES 2014 Meeting Leaders

SAGES Panel/Session/Symposium/Debates Chairs/Co-Chairs:

Acute Care Session (joint with AAST) Panel
Chair: Gregory Dakin, MD
Co-Chair: Jonathan Dort, MD

Adolescent Bariatric Surgery (joint with IPEG) Panel
Chair: Janye Pratt, MD
Co-Chair: Carroll Harmon, MD, PhD

Avoiding Bile Duct Injury and Other Untoward Outcomes Panel
Chair: Robert Panelli, MD
Co-Chair: Horacio Asbun, MD

Building and Optimizing A Surgical Practice Panel
Chair: Brian Jacob, MD
Co-Chair: Josh Roller, MD

Colorectal Strategies to Minimize the Impact of Surgery Panel
Chair: Steven Wexner, MD
Co-Chair: Kirk Ludwig, MD

Complex and Unusual Esophageal Disorders (joint with SSAT) Panel
Chair: Kyle Perry, MD
Co-Chair: Andrew Wright, MD

Endocrine Surgery Panel
Chair: William Inabnet III, MD
Co-Chair: Vanessa Palter, MD

GI Cancer Management (joint with KSELS) Panel
Chair: Vivian Strong, MD
Co-Chairs: Hong-Jin Kim, MD, PhD and Matthew Kalady, MD

Innovation in the US - The Future of Surgical Innovation Panel
Chair: Ross Goldberg, MD
Co-Chair: Ben Poulose, MD MPH

MIS Jeopardy Panel
Chair: Anne Lidor, MD MPH
Co-Chair: Simon Bergman, MD

Lessons Learned from Around the World (joint with EAES) Panel
Chair: Allan Okrainec, MD
Co-Chair: Mario Morino, MD

Lessons Learned from Military Surgery Panel
Chair: Michael Ujiki, MD
Co-Chair: Yong Choi, MD

Management of Unusual and Complex Cases (joint with JSES) Panel
Chair: Manabu Yamamoto, MD
Co-Chair: Steven Schwartzberg, MD

Open to MIS - What is Taking Us So Long? Panel
Chair: Jeffrey Hazey, MD
Co-Chair: W. Scott Melvin, MD

Perioperative Care Panel
Chair: Matthew Hutter, MD MPH
Co-Chair: Steven Bowers, MD

Quality Practices in Surgical Education and Training Panel
Chair: Michael Awad, MD
Co-Chair: James Bittner, MD

Simulation and Telerobotics Panel
Chair: Mehran Anvari, MD
Co-Chair: John Paige, MD

Technology Innovation from Overseas (Program of the Americas) Panel
Chair: Natan Zundel, MD
Co-Chair: Dmitry Oleynikov, MD

SAGES Talks
Chair: Brian Dunkin, MD
Co-Chair: Melina Vassiliou, MD

The Science Behind Diabetes Therapy Panel
Chair: John Morton, MD
Co-Chair: Timothy Jackson, MD MPH

See you in Court - Legal Consequences of Bile Duct Injury during Laparoscopic Cholecystectomy Mock Trial
Chair: Michael Edey, MD
Co-Chair: Jon Gould, MD

Emerging Technology Session
Chair: J. Stephen Scott, MD
Co-Chair: Daniel Scott, MD

Residents/Fellows Scientific Session
Chair: Linda Zang, MD
Co-Chair: Iswanto Sucandy, MD

Top 21 Video Session
Chair: Kenric Murayama, MD
Co-Chair: Archana Ramaswamy, MD

Video Shorts (Top Videos) Session
Chair: Dean Mikami, MD
Co-Chair: Elisabeth McLemore, MD

Career Development Seminar
Chair: David Urbach, MD
Co-Chair: Adrian Park, MD

Minimal Access - Lessons from NOTES and Single Site Surgery Symposium
Chair: Dana Portenier, MD
Co-Chair: Kurt Roberts, MD

SAGES SMART™ Program Symposium
Chair: Liane Feldman, MD
Co-Chair: Thomas Aloia, MD

Adolescent Achalasia (joint with IPEG) Debate
Chair: Gretchen Purcell Jackson, MD, PhD; and Shawn St. Peter, MD

Inguinal Hernia Debates
Chair: Melissa Phillips, MD
Co-Chair: David Earle, MD

Presidential Debates
Chair: Christopher Schlachta, MD
Co-Chair: Jo Buyske, MD

SAGES Accreditation

Accreditation: The Society of American Gastrointestinal and Endoscopic Surgeons (SAGES) is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to sponsor Continuing Medical Education for physicians.

The Society of American Gastrointestinal and Endoscopic Surgeons (SAGES) designates this live activity for a maximum of 33.75 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Self-Assessment CME Credit, Part 2 of the American Board of Surgery (ABS) Maintenance of Certification (MOC) Program

This activity has also been designated as Self-Assessment CME credit, applicable to Part 2 of the ABS MOC program. In order to claim Self-Assessment credit, attendees must participate in a post meeting quiz. For additional information on the ABS MOC program and its requirements, visit the ABS website at: http://home.absurgery.org/default.jsp?exam-moc.
SAGES Goes Green!

In our continuing effort to support the environment, you will see less paper at the SAGES 2015 Annual Meeting. The printed Final Program will include the regular schedule and course/panel outlines only. Electronic copies of all the abstracts and digital posters will be available on-line for all attendees and in the SAGES 2015 Meeting App.

Go to sages2015.org for more information.
Half-Day Postgraduate Course:
The Recurrent Hernia – Strategies for Success
Chair: Philip Omotosho, MD; Co-Chair: Sharon Bachman, MD

SESSION DESCRIPTION
Ventral incisional hernia is a common problem evaluated by general surgeons, with an estimated 250,000 ventral hernia repairs performed annually in the United States. Approximately one quarter of ventral hernias repaired with mesh will recur within 3 years. General surgeons who manage this common problem, therefore, need to be thoroughly familiar with the risk factors for recurrence and their mitigation, and be familiar with advanced techniques for its optimal management.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Identify risk factors for ventral hernia recurrence and how to mitigate them
• Compare advanced techniques and employ them appropriately in managing recurrent ventral hernias
• Recognize difficult situations in recurrent ventral hernia repair

**Half-Day Postgraduate Course: Endolumenal Management of Complications**

**Chair: John Mellinger, MD; Co-Chair: Jeffrey Marks, MD**

**SESSION DESCRIPTION**

This session will focus on use of endoscopic and intraluminal strategies for managing surgical and endoscopic complications. Topics will include endoscopic hemostasis, stenting, drainage, resection, diversion, and closure. Particular focus will be given to areas where endolumenal techniques may help address complex surgical and surgical disease related complications in a minimally or less invasive fashion. National and international experts in endolumenal and endoscopic therapy will constitute the faculty.

**SESSION OBJECTIVES**

At the conclusion of this session, participants will be able to:

- Appraise the relative merits of endolumenal techniques vs. surgical options in managing complications of foregut surgery including bariatric operations.
- Identify training requirements inherent in adopting new endolumenal techniques into safe and effective clinical practice.
- Choose amongst available options the best strategies for managing complications via endolumenal or other techniques in an evidence-based fashion.

**SAGES 2015 Medical Student Scholarship Award**

Medical students enrolled in medical schools located in the United States and Canada are invited to submit a 500 word essay explaining why he/she should be selected to attend SAGES Surgical Spring Week April 15-18, 2015 in Nashville, Tennessee.

Award includes: $2,000, and mentorship at 2015 Meeting

Deadline to Apply and Submit Essay: February 6, 2015

**Postgraduate Course:**

**Current Common Dilemmas in Colorectal Surgery**

**Chair:** Christopher Schlachta, MD; **Co-Chair:** Patricia Sylla, MD

**SESSION DESCRIPTION**

This course will address common challenges which often represent dilemmas in management, judgment or technology choice that might present in the care of a patient with colorectal disease. Through didactic lectures, video-based case discussions and panel discussions with audience participation, attendees will learn strategies derived from the latest available evidence and expert opinion for tackling these scenarios. This course is designed for any practicing surgeon who incorporates colon and rectal surgery into his or her practice.

**SESSION OBJECTIVES**

At the conclusion of this session, participants will be able to:

- Manage common clinical dilemmas presenting to practitioners of colon and rectal surgery
- Select the most appropriate approach between a wide range of available techniques for minimally invasive colon and rectal surgery with an appreciation for the most appropriate application of each
- Formulate a management plan for operative dilemmas that may arise during surgical therapy of patients undergoing colon and rectal surgery

Panel: Lessons Learned from Around the World (joint with EAES)
Chair: Allan Okrainec, MD; Co-Chair: Mario Morino, MD

SESSION DESCRIPTION
Surgery is constantly evolving with many new approaches to surgical techniques being developed around the world. This session will highlight new advances in several areas including colorectal, hepatobiliary, bariatric and foregut surgery from experts around the world.

SESSION OBJECTIVES
- Describe expected outcomes from various bariatric surgical procedures from worldwide data
- Implement standardized steps for laparoscopic TME
- Differentiate which lesions are optimal for laparoscopic liver resection
- Illustrate the key steps of a POEM procedure
- Identify tools from Interventional Radiology that can be used in the operating room
- Describe the technical steps and benefits of a modified mesocolic excision for colon cancer

Panel: Perioperative Care – Evidence Based Practice in 2015
Chair: Matthew Hutter, MD MPH; Co-Chair: Steven Bowers, MD

SESSION DESCRIPTION
This session will focus on aspects of perioperative care, which have been shown to be associated with improved outcomes. Topics include ERAS and Pathways, Using SAGES Guidelines, as well as Rescue and Communication. Procedure specific better practices for perioperative care will be examined in detail for Colorectal, Foregut/Esophagectomy, Bariatric and Hernia Operations.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Demonstrate the effectiveness of measures (Preoperative weight loss and/or LMR, sleep apnea management, therapeutic/prophylactic anticoagulation, use of drains, post-op contrast studies) that have been found to influence outcomes after bariatric surgery. This talk will also include management of anticoagulation and prophylaxis of venous thrombosis
• Demonstrate the effectiveness of measures (Abdominal wall blocks, Narcotic avoidance strategies, seroma interventions, management of transfixation site pain) that have been found to influence outcomes after ventral hernia surgery
• Demonstrate the effectiveness of measures (Immune enhancing Nutrition, gastric conduit preconditioning, protocolized anesthesia care, atrial fibrillation management, delayed oral feeding) that have been found to influence outcomes after foregut resection
• Demonstrate the effectiveness of measures (Preoperative tumor localization, Management of biological therapies and steroids, Enhanced recovery pathways, timing of stoma takedown and planned interval resection after drainage of abscess) that have been found to influence outcomes after colorectal surgery

Scientific Session / Concurrent Sessions
Accepted Oral & Video Presentations

The entire 2015 meeting has been designated for Self-Assessment CME Credit, applicable to Part 2 of the American Board of Surgery (ABS) Maintenance of Certification (MOC) Program. In order to claim Self-Assessment credit, attendees must participate in a post meeting quiz.
Wednesday, April 15, 2015

The 9th Annual SAGES Foundation Awards Luncheon

SAGES does not offer CME for this session

This annual ticketed event celebrates and honors distinguished leaders in minimally invasive surgery. Proceeds benefit the SAGES Foundation and its mission to advance endoscopic, laparoscopic and emerging minimal access surgical methods and patient care. The 2015 Awards Luncheon features awards and research grants presented to outstanding surgeons and educators for their work in minimally invasive surgery and raises funds to keep patient safety and surgical innovation in the forefront.

The Following Awards Will Be Presented:

- SAGES Career Development Award & Research Grant Awards
- SAGES Young Researcher Award
- SAGES Researcher in Training Award
- SAGES IRCAD Traveling Fellowship Award
  SAGES acknowledges a generous grant in support of this award from Karl Storz Endoscopy
- SAGES Brandeis Awards (2 recipients)
  SAGES acknowledges a generous grant in support of one award from the SAGES Foundation
- SAGES Foundation Margrét Oddsdóttir Traveling Fellowship Award
- SAGES Foundation Gerald Marks Rectal Cancer Award
- SAGES Foundation Excellence in Medical Leadership Award
  Generously funded through an unrestricted educational grant from W.L. Gore & Associates
- SAGES Foundation Jeffrey L. Ponsky Master Educator in Endoscopy Award
- Arnold P. Gold Foundation Excellence in Humanistic Clinical Care Award
  SAGES acknowledges a generous grant in support of this award from the Arnold P. Gold Foundation
- SAGES International Ambassador Award
- SAGES Pioneer in Surgical Endoscopy Award
- SAGES Distinguished Service Award
- SAGES Berci Lifetime Achievement Award

How to RSVP:
To become an event sponsor, purchase individual tickets, tables, or virtual ads, please contact the Foundation office at (310) 437-0544 ext. 113 or foundation@sages.org. Individual tickets $150 each and tables of ten are available for $1,275. Since this event benefits the SAGES Foundation, a portion of your purchase is tax-deductible to the extent permitted by law.

Some of our SAGES 2014 Winners:
Wednesday, April 15, 2015

12:00PM - 3:30PM *Included in Registration SuperPass (Option A) or Registration Option B

Exhibits/Posters

Video Shorts
This year SAGES is pleased to introduce a new video theater in the exhibit hall. The theater will showcase short video submissions from a variety of authors and topics. We think this is the ideal session for any of your with a few extra minutes to cover a lot of information. Talks will be moderated and presented by the authors, but this is a non-CME session.

1:30PM - 5:30PM *Included in Registration SuperPass (Option A) or Registration Option B

Half-Day Postgraduate Course: Bariatric Revisions from Historical Operations
Chair: Kevin Reavis, MD; Co-Chair: Brandon Williams, MD

SESSION DESCRIPTION
As Bariatric surgery matures as a surgical subspecialty, patients are now presenting for revisional candidacy years and decades following their index operation. Familiarity with the index operation is often lacking on the part of the patient and the consulted surgeon. Surgeons who are serving this increasingly complex and challenging patient population will benefit from this session.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Classify the types of past and present bariatric surgical procedures
• Differentiate the various types of problems that present years/decades following bariatric surgery
• Formulate a strategy for assessing and safely treating long term sequelae of prior bariatric procedures

**Half-Day Hands-On Course: Endoscopic Management of Complications**  
Chair: Jose Martinez, MD; Co-Chair: Bipan Chand, MD

**SESSION DESCRIPTION**  
This hands-on course is designed for all levels of trainees and attending staff. The session is suitable for any assisting staff in the Operating or endoscopy room. The participant will perform a number of therapeutic endoscopic interventions including: band ligation, saline lift, endoscopic mucosal resection, foreign body retrieval, use of endoscopic cautery, endoscopic clipping and stenting. (Participants will work on ex-vivo models and simulators within the course)

**SESSION OBJECTIVES**  
At the conclusion of this session, participants will be able to:
- Demonstrate ability to connect and test components of endoscopic tower
- Select appropriate endoscopic tools for the management of bleeding, leaks, polyp resection and stricture management.
- Demonstrate understanding of the techniques used for polypectomy, hemorrhage control, clip placement and stent deployment.

**ACTIVITY OUTLINE**  
Participants will be divided into a number of stations. Each station will start with an introduction to the parts of the endoscopic tower and its setup and troubleshooting.

Next, the participant will follow a series of therapeutic interventions to include during the Neoplasia Station:
1. Create polyps using a band ligator
2. Perform saline lifts on polyps created with scleral needle to simulate EMR technique
3. Once polyp resected treat base as an ulcer
4. Use cautery to burn base of polyp resected (learn use and difference between monopolar and bipolar endoscopic energy)
5. Burned base becomes a perforation (use clips to perform a closure of perforation)
6. Remove polyps resected using retrievers as demonstration of foreign body removal

**THE STATIONS WILL INCLUDE:**  
Upper GI Neoplasia, Barrett’s Esophagus Ablation, Endoscopic Antireflux Therapy, Endoscopic Suturing, Upper/Lower GI Stenting

**INVITED FACULTY:**  
Diya Alaedeen, MD; Juan Astudillo, MD; Robert Bowles, MD; Diego Camacho, MD; Jeffrey Hazey, MD; Jeffrey Marks, MD; John Mellinger, MD; Dean Mikami, MD; Nabil Tariq, MD; Thadeus Trus, MD; Kevin Wasco, MD

---

**Half-Day Hands-On Course: Career Breakouts**  
Chair: Rebecca Petersen, MD MSc; Co-Chair: Dimitrios Stefanidis, MD, PhD

**SESSION DESCRIPTION**  
Grant writing and review, manuscript writing and review, and landing your first job.

Residents and fellows close to completing training or young attendings should attend the “Career Breakouts” session. Bringing own papers/grants for review is encouraged.

**SESSION OBJECTIVES**  
At the conclusion of this session, participants will be able to:
- Recognize deficiencies in grant writing and manuscript preparation
- Apply techniques to improve grant writing and manuscript preparation
- Formulate plans for post-training careers

**ACTIVITY OUTLINE**

  - Review good and bad grant examples
  - Scoring sheets
  - Breakout in small groups to develop grant “concept sheets” for critique & review

| 1:30PM - 3:00PM | Manuscript Preparation & Review | David Urbach, MD Kyle Perry, MD Kfir Ben-David, MD |

  - Review good & bad manuscripts in small groups
  - Provide outline of critical elements to writing a great manuscript
  - Small groups to develop a manuscript outline for critique and review

| 3:00PM - 3:15PM | Break |  |

| 3:30PM - 5:30PM | Landing your First Job | Group Leader: David Rattner, MD Critique Panel: Adrian Park, MD; David Urbach, MD; Dimitrios Stefanidis, MD, PhD; Rebecca Petersen, MD MSc; Melena Vassiliou, MD; Kyle Perry, MD; Dana Telem, MD |

  - Mock interviews. Facilitator to appoint chief and new hire candidate. Plan for 10 minute role play sessions. Session Leader/Panel discussion to provide and solicit feedback during and at the end of each interview (15 minutes).

---

Note for Participants: Target audience is residents and fellows near completion of training or young attendings. Bringing own papers/grants for review is encouraged!
Debate: Inguinal Hernia Debates
Chair: Melissa Phillips, MD; Co-Chair: David Earle, MD

SESSION DESCRIPTION
This session will present a debate style approach to current controversies in the repair of inguinal hernia. It addresses surgical technique including fixation methods and modifications of technique in the setting of incarceration and/or strangulation. This session is designed for the general surgeon and laparoscopic surgeon interested in MIS hernia repair.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Evaluate the surgical techniques for inguinal hernia repair including the advantages and disadvantages of each surgical option
• Differentiate laparoscopic mesh fixation options with specific attention to patient outcomes
• Address the modifications of surgical techniques in inguinal hernia repair that are required when incarcerated and/or strangulated bowel is present in the surgical field

Panel: Colorectal Strategies to Minimize the Impact of Surgery
Chair: Steven Wexner, MD; Co-Chair: Kirk Ludwig, MD

SESSION DESCRIPTION
This session will highlight innovative techniques that reduce the impact of surgery and improve the outcomes for patients with rectal lesions, such as transanal endoscopic surgery and transanal endoscopic total mesorectal excision, strategies for doing reoperative laparoscopic surgery to spare patients a standard laparotomy, and strategies for minimizing postoperative pain and reducing length of stay after surgery, which should improve patient experience and also improve outcomes. Finally, strategies for managing expectations in an era of new technology and new patient pathways for coming into and out of the hospital will be addressed. The session should be of interest to Colon and Rectal Surgeons and General Surgeons.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Articulate, apply and perhaps implement transanal microsurgical techniques in the care of patients with benign and malignant rectal disease
• Organize and implement a fast track protocol using pain management advances and ileus reducing strategies to optimize outcomes
• Discriminate what can and what perhaps cannot be done safely with reoperative laparoscopic colon and rectal surgery
• Integrate strategies for managing patient expectations into their practice

Panel: Technology Innovation from Overseas (Program of the Americas)
Chair: Natan Zundel, MD; Co-Chair: Dmitry Oleynikov, MD

SESSION DESCRIPTION
This session is dedicated to introduction of new technology being used by international and north and south Americans for novel surgical care. Attendance of the session should be by all surgeons interested in new technology.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Identify new technological breakthroughs that can significantly improve their patient care
• Evaluate new technology and its potential to change practice patterns
• Select which technologies can help them and which are not yet passed the early experimental stages

Panel: Endocrine Surgery – Balancing Innovation and Quality
Chair: William Inabnet III, MD; Co-Chair: Vanessa Palter, MD

SESSION DESCRIPTION
The assessment, work-up and surgical management of endocrine diseases involving the thyroid, adrenal, pancreas and parathyroid can be challenging. This session will provide an approach to the management of these conditions with a minimally invasive focus. In addition, innovative approaches to the surgical management of endocrine diseases will be discussed.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Manage patients with thyroid nodules and thyroid cancer according to the revised ATA guidelines
• Identify and differentiate between the various types of functioning adrenal nodules and manage them accordingly
• Recognize patients with pancreatic neuroendocrine tumours and plan an appropriate operative approach
• Integrate different minimally invasive techniques for endocrine surgery into their practice
• Understand quality metrics as they apply to endocrine surgery

### Panel: GI Cancer Management (joint with KSELS)

**Chair:** Vivian Strong, MD; **Co-Chair:** Hong-Jin Kim, MD, PhD; & Matthew Kalady, MD

#### SESSION DESCRIPTION

This panel is intended for the general surgeon encountering upper and lower GI malignancies. The aim is to provide updated staging and treatment recommendations based on evidence-based data. The goal is also to discuss the role for emerging applications of minimally invasive approaches in the treatment of these malignancies.

#### SESSION OBJECTIVES

At the conclusion of this session, participants will be able to:

- Understand the newest approaches to the staging, workup and robotic treatment options for esophageal cancer
- Discuss the updated approaches to the staging, workup and MIS treatment options for gastric cancer
- Learn about colorectal mesocolic excision, and understand staging and workup for rectal cancer in addition to techniques for robotic resection

### Panel: Innovation in the US – The Future of Surgical Innovation

**Chair:** Ross Goldberg, MD; **Co-Chair:** Ben Poulose, MD MPH

#### SESSION DESCRIPTION

As more focus has turned to cost containment, the question arises as to where does innovation fit into this new age of health care? What is the surgeon's role? Every surgeon needs to know how and where they can succeed in this new realm of cost containment while still advancing the science and technology of surgery.

#### SESSION OBJECTIVES

At the conclusion of this session, participants will be able to:

- Demonstrate an understanding of how innovation fits into the new era of cost containment
- Apply the discussed techniques to bring innovation to their practices and their hospitals
- Articulate how the FDA fosters innovation with surgeons

**Wednesday, April 15, 2015**

3:30PM - 5:00PM

**Scientific Session / Concurrent Sessions**

*Included in Registration SuperPass (Option A) or Registration Option B

*Accepted Oral & Video Presentations*

5:00PM - 5:30PM

**Opening Session - History Movie**

Moderator: L. Michael Brunt, MD

*SAGES does not offer CME for this session*

SAGES has commissioned a documentary film to tell the story of the founding of SAGES and the work of Dr Gerald Marks and other leaders in forming an organization dedicated to surgeons interested in flexible GI endoscopy. The film will present the original concept of the founders and their struggles to form a new surgical society along with the many challenges and successes of those early years.

We encourage you to all attend the new opening session at SAGES 2015. We will also review expected highlights for the meeting and share updates from SAGES.

5:30PM – 7:30PM

**Exhibits Opening Welcome Reception**

Free to All Paid Registrants and Guests!

---

**What’s New in the Exhibit Hall?**

There are more reasons than ever to visit the exhibit hall! In addition to the latest and greatest products and technologies, you will find:

- **New Wednesday Hours** – Added 12:00pm - 3:30pm
- **SAGES Cafe and Theatre** – pick up lunch or a snack, and enjoy the new “Video Shorts” sessions every afternoon
- **Happy (Half) Hour** – join exhibitors for a beer and a snack before heading back to the sessions! Or, grab a cup of coffee and visit the exhibits during the morning break.
- **Exhibit Hall Oasis/Charging Station** – stop in for a break while charging phones, computers and tablets, or check email at the internet station.
- **Exhibits will be closed on Saturday** – please plan accordingly

Thursday, April 16, 2015

**Full-Day Military Surgical Symposium**

**Chair:** LTC (P) Robert Lim, MD; **Co-Chair:** Gordon Wisbach, MD

**Note:** This is not an official Department of Defense event.

**SESSION DESCRIPTION**

The intent of this conference is to provide a forum for the presentation and discussion of current and ongoing military and military-relevant research, as well as educational topics of relevance to the military surgical community. Both civilian and military experts from various fields will present their ideas and lessons on surgical care in order to foster the continued interaction and exchange of ideas between the civilian and military medical communities.

**SESSION OBJECTIVES**

At the conclusion of this session, participants will be able to:

- Identify and address specific care issues related to combat surgical care and improve patient survival rates.
- Recognize the specific care issues related to austere environment surgical care.
- Integrate surgical advancements learned from the battlefield surgical care into garrison practice and improve patient safety.

**Postgraduate Course: Updates in Abdominal Wall Management – Mesh Theory, Tissue Use, Complex Locations**

**Chair: William Hope, MD; Co-Chair: Chan Park, MD**

**SESSION DESCRIPTION**
This session/post graduate course will cover current and evolving mesh technology and new surgical techniques relating to abdominal wall hernias and is intended for all general and laparoscopic surgeons performing hernia repair. The course will also review preoperative and postoperative strategies for a successful hernia repair as well as techniques for repair of complex hernias and hernias in difficult locations.

**SESSION OBJECTIVES**
At the conclusion of this session, participants will be able to:
- Distinguish between different mesh technology, understand the rationale behind the use of particular meshes for different clinical situations, and select appropriate meshes based on hernia and patient characteristics
- Implement a preoperative strategy to handle complex hernias/patients and minimize risk factors for adverse outcomes and improve patient safety
- Understand and employ the techniques available for repair of abdominal wall hernias and recognize the risk and benefits of the differing techniques and their outcomes

Postgraduate Course: FUSE™ - Preparation/Refresher Course
Chair: Daniel Jones, MD; Co-Chair: Pascal Fuchshuber, MD; and Thomas Robinson, MD

SESSION DESCRIPTION
Energy-based devices may facilitate or even enable complex procedures, yet despite their frequent use, they remain poorly understood. This Postgraduate course is open to all physicians and allied health care professionals. It is designed to inform and promote best practices for the use of electrosurgical, ultrasonic and other energy sources in the OR. Any health care professional who has ever used an energy-based device in the OR will better understand how it works, when to apply it, and what possible hazards and errors can occur. The session is envisioned as a refresher course after participants have completed the SAGES FUSE™ online curriculum - available for no cost at http://www.fundamentals-didactics.com/.

The FUSE exam will be offered Wednesday, Thursday and Friday during the SAGES Annual Meeting. To purchase a FUSE test voucher, please go to http://www.fuseprogram.org/testing-information/sages-annual-meeting-2015/. Those who successfully pass the exam will be awarded FUSE certification.

SESSION OBJECTIVES:
At the conclusion of this session, participants will be able to:
- Understand the fundamental indications and limitations of energy sources in the OR
- Discuss the potential complications and safety implications of surgical energy-based devices in the OR and endoscopic suite
- Understand the underlying physics and principles of radiofrequency based surgical and endoscopic energy-based devices
- Understand the underlying physics and principles of ultrasound based surgical and endoscopic energy-based devices
- Discuss the specific aspects of monopolar and bipolar cutting and sealing devices in open and laparoscopic surgery and list the potential hazards of incorrect function of these devices
- Apply best practices for the use of energy-based devices in the OR and endoscopy suite

### Symposium: Minimal Access – Lessons from NOTES and Single Site Surgery

**Chair:** Dana Portenier, MD; **Co-Chair:** Kurt Roberts, MD

**SESSION DESCRIPTION**
Attendees interested will learn about the state of the art, outcomes and pros and cons about performing Single Site Surgery and Natural Orifice Transluminal Endoscopic Surgery.

**SESSION OBJECTIVES**
At the conclusion of this session, participants will be able to:
- Demonstrate and integrate knowledge about indications for single port, reduced port surgery and NOTES in their daily practice
- Compare safety and identify pitfalls in single port, reduced port and NOTES surgeries compared to traditional laparoscopic
- Differentiate and articulate the advantages and disadvantages of single port, reduced port and NOTES surgeries

### Panel: Complex and Unusual Esophageal Disorders (joint with SSAT)

**Chair:** Kyle Perry, MD; **Co-Chair:** Andrew Wright, MD

**SESSION DESCRIPTION**
This session will consist of a series of lectures focusing on the diagnosis and management of complex esophageal disorders. The primary focus will be to expose surgeons to the evolving laparoscopic and endoscopic approaches to disease management.

**SESSION OBJECTIVES**
At the conclusion of this session, participants will be able to:
- Identify available treatment approaches to complex esophageal diseases including intramural masses and motility disorders
- Identify patients who will benefit from laparoscopic repair of recurrent hiatal hernia and articulate the critical components of this procedure
- Recognize opportunities for laparoscopic and endoscopic management of esophageal perforation

10:30AM - 11:15AM
Humanitarian Lecture – “Global Surgery: Levering Laparoscopy to Improve Overall Surgical Care”
Speaker: Horacio Asbun, MD

Dr. Asbun is a Professor of Surgery, Mayo Clinic College of Medicine and the Chairman of General Surgery at Mayo Clinic Florida. He also serves as Co-Director of Hepato-Biliary and Pancreas Program, at Mayo Clinic Florida.

SESSION DESCRIPTION
Multiple individuals, organizations and institutions spent significant efforts in global surgery. This lecture is geared to share how coordinated efforts and commitment from multiple SAGES members through the SAGES Global Affairs Committee has resulted in successful and sustainable surgical programs, positively affecting delivery of surgical care in low-resource countries.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Build relationships to develop sustainable programs
• Improve efficiency in his/her efforts and resource expenditures in global surgery
• Recognize that globalization in surgery has allowed for empowerment of the individual, which is key to positive change in the field
• Recognize that quality and outcomes measures are key to a successful program

11:15AM - 12:00PM
Karl Storz Lecture
“No Shortcuts to the Top-Climbing the World’s Highest Peaks”
Speaker: Ed Viesturs

Ed Viesturs is a professional mountaineer, writer, speaker, and veterinarian who is widely regarded as this country’s foremost high-altitude mountaineer. He is familiar to many from the 1996 IMAX documentary EVEREST. Viesturs has successfully reached the summits of all of the world’s fourteen 8000-meter peaks without supplemental oxygen, an 18 year project, and is one of only a handful of climbers in history (and the only American) to accomplish this feat. His goal was completed on May 12, 2005 with his ascent of Annapurna, one of the world’s most treacherous peaks. For this accomplishment, in 2005 he was named National Geographic’s Adventurer of the Year.  Ed also serves as a member of the Board of Directors for Big City Mountaineers (BCM), an organization that instils critical life skills in under-resourced youth through wilderness mentoring experiences that help keep kids in school, reduce violence and drug use.

SAGES acknowledges Karl Storz Endoscopy-America for a generous endowment in support of this lecture.

12:00PM - 1:30PM
Educator’s Luncheon “Milestones, Metrics, and Mastery – A Focus on Surgical Trainee Education and Assessment”
Chair: Brent Matthews, MD; Co-Chair: Matthew Goldblatt, MD

SESSION DESCRIPTION
One of the foundations of surgical education is the ability to assess trainee performance, so that skills may be quantified and improved upon. This had led to a proliferation of metrics for the assessment of technical, and to a lesser extent, non-technical surgical skills. Modern surgical curricula have increasingly adopted a proficiency-based approach, with trainee progression conditional upon the achievement of predetermined benchmarks of proficiency. This session aims to discuss the role of such milestones in the modern surgical trainee’s clinical practice. It will be of interest to all surgeons involved in resident education. Current practice and evidence for available assessment tools will be examined, as well as their translation into clinical practice. Additionally, the panel will highlight where current gaps in trainee assessment exist, and the role these might play in the future of surgical curricular development.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Describe objective measures of trainee performance
• Explain the relevance of trainee milestones to clinical practice
• Discuss training gaps which currently exist and how they might be addressed

**Postgraduate Course: HPB / Robotics – Current State of MIS Hepatopancreatobiliary Surgery**

**Chair: Eugene Ceppa, MD; Co-Chair: David Sindram, MD, PhD**

**SESSION DESCRIPTION**

Hepatopancreatobiliary (HPB) surgery for many years has lagged behind other specialty surgical disciplines in adopting minimally invasive techniques. Currently, less than 10% of all HPB surgeries are performed minimally invasively in the USA. This session intends to bring all members of SAGES up to date on the current state of HPB surgery in terms of what is currently possible, feasible, safe from a minimally invasive approach.

**SESSION OBJECTIVES**

At the conclusion of this session, participants will be able to:

- Apply multiple minimally invasive approaches towards hepatectomy
- Create or Integrate a robotic cholecystectomy practice in any hospital system [university, private, VA]
- Know the risk profile (morbidity/mortality) of patients undergoing minimally invasive hepatectomy
- Apply a logical and step-wise approach to laparoscopic common bile duct exploration
- List three critical skills necessary to perform minimally invasive pancreatectomy safely

**Video Shorts**

This year SAGES is pleased to introduce a new video theater in the exhibit hall. The theater will showcase short video submissions from a variety of authors and topics. We think this is the ideal session for any of your with a few extra minutes to cover a lot of information. Talks will be moderated and presented by the authors, but this is a non-CME session.
Thursday, April 16, 2015

**Half-Day Hands-On Course: All Things Hernia**

*Chair: Shawn Tsuda, MD; Co-Chairs: Carla Pugh, MD, PhD; and Guy Voeller, MD*

**SESSION DESCRIPTION**

This course is for surgeons who seek to improve their knowledge and skills in advanced hernia techniques including open anterior and posterior components separation and laparoscopic primary defect closure. Participants in this cadaver lab will perform the following procedures:

- Endoscopic components separation
- Open, perforator sparing, anterior external oblique release
- Open, TAR release

Additionally, participants will rotate to two dry lab stations to practice Laparoscopic hernia repair with primary closure and Endoscopic components separation.

Faculty to student ratio will be 1:3.

**SESSION OBJECTIVES**

At the conclusion of this session, participants will be able to:

- Recognize the need for and employ components separation in complex ventral hernias, with both open and minimally invasive techniques
- Identify situations where there is risk to nerve and vascular structures and demonstrate how to actively avoid them
- Describe the advantages, disadvantages, and barriers to various mesh choices in the repair of complex ventral hernias

**SAGES ADOPT Program**

2015 - 2016: Advanced hernia techniques including open anterior and posterior components separation • laparoscopic primary defect closure

**Goal:** Assist you to expand and/or improve your surgical practice through adoption of new procedures/techniques.

Participants in this 1-year-long program will receive the following:

- Instruction by SAGES experts during the 2015 Hernia Hands on Course utilizing a standardized teaching technique (Lapco TT),
- Mentorship through the year by SAGES experts and faculty,
- Mentor – mentee webinar to cover additional techniques,
- Follow up surveys and question & answer opportunities,
- Face-to-face interaction with mentors at the ACS Clinical Congress in October 2015,
- Opportunity to present your outcomes at the 2016 SAGES Annual Meeting.

At the 2016 SAGES Annual Meeting, those volunteer learners who have fully participated in the program will have the opportunity to present their outcome data as a podium presentation. Mentors will be involved in the presentation development and submission process.

Mentors will be selected from the above faculty.

**To participate:**

**STEP ONE:** Register for the SAGES “All Things Hernia” Hands On Course.

**STEP TWO:** Select the ADOPT Program option for an additional $299.

Questions? Contact Erin Schwarz, SAGES CME Manager, erin@bscmanage.com.

*Participants must register for the SAGES Hernia Hands On Course at the applicable registration rate, then pay the additional $299. Participants in ADOPT must be practicing physicians in the US/Canada.*
Half-Day Hands-On Course: Minimal Access Tricks and Techniques
Chair: Garth Jacobsen, MD; Co-Chairs: Giovanni Dapri, MD, PhD and Joe Iocono, MD

SESSION DESCRIPTION
This is an animate hands-on course which serves to incorporate the skills and principles as outlined in the Symposium on Minimal Access: Lessons from NOTES and single site surgery. Participants will receive instruction by world class experts in the utilization of minimal access techniques, and the implementation of new technology to achieve that goal. Participants will gain exposure to a variety of new technologies as well as innovative techniques, including multiport access devices and novel multi-instrument operating platforms. Sessions will include instruction in performing microsurgical and or single incision cholecystectomy, simulated appendectomy, Nissen fundoplication, nephrectomy, sleeve gastrectomy and distal pancreatectomy, and pyloromyotomy. In addition there will be several technology demonstration stations which will showcase the newest developments in minimal access surgery. (Participants will work on animate models)

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Identify and utilize various instruments and platforms that may facilitate reduced port and single port operations
• Enhance their technical ability to perform reduced port and single port operations
• Describe operative strategies for reduced port and single port operations (ie Nissen fundoplication, appendectomy, splenectomy, nephrectomy, distal pancreatectomy, and pyloromyotomy)

Panel: Management of Unusual and Complex Cases – Similarities and Differences across the Ocean (joint with JSES)
Chair: Manabu Yamamoto, MD; Co-Chair: Steven Schwaitzberg, MD

SESSION DESCRIPTION
Philosophy, training, disease features and resource access all impact how certain types of problems are managed around the world. The ongoing SAGES–JSES symposium series examines how complex cases are handled by experts in Japan and North America. Our experts are presented with a challenging case and will present their views on management. The opportunity to contrast and compare disease and surgical/endoscopic management may provide new management approaches for attendees.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Distinguish the differences how disease may present differently in other parts of the world
• Implement potential new disease management schemes that are applicable to clinical problems encountered in order to achieve improved outcomes
• Employ alternative strategies to technical issues successfully utilized transcontinentally such as staple line leakage

1:30PM - 3:00PM

Panel: SAGES Talks
Chair: Brian Dunkin, MD; Co-Chair: Melina Vassiliou, MD

SESSION DESCRIPTION
SAGES has added a new format for talks this year moving away from standard powerpoint delivery. Come experience out of the box presentations on cutting edge ideas. Modeled after the well-known TED™-talks, this session will highlight new ideas, innovators and forward thinkers. It is an opportunity to discover and connect with creative leaders, rule-breakers and a community of people interested in improving how we take care of surgical patients. Anyone who enjoys powerful talks, who wants to be inspired and who is looking to the future should attend this session.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Articulate threats to patient safety related to the healthcare system
• Identify novel ways to improve surgical education through the use of technologies such as crowd-sourcing and computer-based translation
• Appraise how technology and robotics can prepare us for the future of surgery

Panel: The Science Behind Diabetes Therapy – Surgery, Medical Updates and Mechanisms
Chair: John Morton, MD; Co-Chair: Timothy Jackson, MD MPH

SESSION DESCRIPTION
Diabetes continues to be a devastating chronic disease associated with significant morbidity and mortality. This session will provide an overview and update on the most recent advances in the treatment of diabetes and metabolic syndrome. The focus will be on both surgical interventions and potential new medical therapies including underlying mechanisms. It is designed for the practicing surgeon, residents, fellows and medical students.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Understand the science behind diabetes therapy including underlying mechanisms
• Differentiate between surgical options and associated mechanisms of action in the treatment of diabetes
• Integrate medical, surgical and endoscopic therapy into the treatment algorithm of patients with diabetes

Refreshment Break / Happy ½ Hour in Exhibit Hall
Panel: Avoiding Bile Duct Injury and Other Untoward Outcomes – Optimizing Your Approach to Cholecystectomy
Chair: Robert Fanelli, MD; Co-Chair: Horacio Asbun, MD

SESSION DESCRIPTION
Surgeons, nurses, mid-level providers, and allied health professionals caring for patients before, during, and after cholecystectomy will gain useful insight from this session that addresses complications and less than optimal outcomes related to cholecystectomy. Panelists will explore modifiable practice factors that improve clinical results, including preoperative, intraoperative, and postoperative decision-making, operative timing and specific techniques, and the avoidance of bile duct injury during cholecystectomy.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
- Adjust their operative approach to include routine achievement of the Critical View of Safety before dividing any structures during cholecystectomy, including an intraoperative pause to confirm identity of structures to be divided.
- Recognize the importance of biliary inflammatory disease in increasing the hazards of surgery, and will select appropriate procedures to be performed at appropriate phases of the disease process based on timing and clinical indicators.
- Distinguish the need for cholangiography and other imaging techniques in defining anatomy from traditional uses when common bile duct stones are suspected.

Panel: Open to MIS – What is Taking Us So Long?
Chair: Jeffrey Hazey, MD; Co-Chair: W. Scott Melvin, MD

SESSION DESCRIPTION
Penetrance of some laparoscopic/MIS procedures (hernia, colorectal, bariatric, HPB) continues to be low despite mounting evidence of clinical efficacy and improved patient recovery with shorter hospital stays, lower wound complications and more rapid return to normal activities/work. This session will highlight hurdles and solutions for practicing surgeons to adopt minimally invasive techniques in the surgical care of hernias, colorectal disease and HPB disease.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
- Compare and contrast the advantages of laparoscopic inguinal and ventral hernia repair, colorectal and HPB relative to open techniques
- Formulate a plan to integrate MIS techniques as they apply to their practice in hernia care, colorectal and HPB

**Panel: Adolescent Bariatric Surgery – What Every Surgeon should Know (joint with IPEG)**
Chair: Janey Pratt, MD; Co-Chair: Carroll Harmon, MD, PhD

**SESSION DESCRIPTION**
In this session we will present and update on the Teen LABBS outcomes study and discuss the anatomic, metabolic and nutritional complications seen after bariatric surgery, especially those that are particularly common in Adolescents. We will also discuss Pregnancy after WLS. This session is for pediatric and adult surgeons who cover bariatric patients or perform bariatric surgery.

**SESSION OBJECTIVES**
At the conclusion of this session, participants will be able to:
• Recognize and treat anatomic, metabolic and nutritional complications of weight loss surgery
• Identify and Diagnose unusual complications that can occur in Pediatric weight loss surgery patients but are rarely seen in adult patients
• Counsel patients on risks and benefits of weight loss surgery before pregnancy
• Counsel patients and develop plans for surgical or medical treatments for weight regain after weight loss surgery

**Community Practice Townhall**
(Non-CME Activity)

**SAGES does not offer CME for this session**
The Community Practice Townhall is an opportunity for private practice, community based or hospital employed surgeons to network and discuss common issues. By sharing problems and solutions we can help SAGES work for you. We hope you can make it!

**Industry Educational Events**
(Non-CME Activity)

**- INTUITIVE SURGICAL invites you to attend an educational symposium**

Check the SAGES website and 2015 Meeting App frequently for SAGES Foundation and/or Industry events (not planned nor accredited for CME by SAGES) which may have been added after this program was printed.
Mock Trial: See You in Court – Legal Consequences of Bile Duct Injury during Laparoscopic Cholecystectomy
Chair: Michael Edye, MD; Co-Chair: Jon Gould, MD

SESSION DESCRIPTION
A surgeon who injured a patient’s bile duct during a laparoscopic cholecystectomy gives evidence in court. Plaintiff and defense counsel make their cases and the judge sends the case to the jury. This mock trial examines the legal process that will likely occur should this type of case go to trial.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Identify situations in which there is a high risk of bile duct injury
• Recognize the indications to convert a laparoscopic case to an open procedure and the steps to take when a bile duct injury is suspected
• Articulate the preoperative, intraoperative, and postoperative strategies for minimizing the possibility of a lawsuit related to a laparoscopic cholecystectomy procedure

Panel: MIS Jeopardy
Chair: Anne Lidor, MD MPH; Co-Chair: Simon Bergman, MD

SESSION DESCRIPTION
SAGES provides up to date guidelines for laparoscopic and endoscopic surgery to all of its members. Despite it being free and easily accessible, approximately half of SAGES members do not use them. SAGES members should be aware of and take advantage of these valuable evidence based guidelines for use in their clinical practice.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
1. Describe the availability and value of SAGES evidence based guidelines.
2. Demonstrate knowledge of how to access and utilize SAGES guidelines to improve their practice of medicine.

ACTIVITY OUTLINE
This will be an exciting and entertaining session held in a game show type format! Three teams with 3-4 MIS experts per team will compete to prove they have the most knowledge of the current SAGES guidelines. U.S., Canada, and International SAGES members will represent their countries on each team—come out to support your team and country!!

INVITED FACULTY
Team USA: Jeffrey Ponsky, MD; Marina Kurian, MD and Daniel Scott, MD
Team Canada: Melina Vassiliou, MD; Christopher Schlachta, MD and Ormond Panton, FRCSC
Team International: Manabu Yamamoto, MD; Alberto Ferreres, PhD and Mario Morino, MD
**Debate: Adolescent Achalasia – The Great Debate (joint with IPEG)**

*Chairs: Gretchen Purcell Jackson, MD, PhD and Todd A. Ponsky, MD*

**SESSION DESCRIPTION**
Over the last decade, a number of new diagnostic and surgical therapies have emerged for achalasia. Unfortunately, little data are available as to whether emerging technologies and procedures are appropriate for adolescent patients with achalasia. This session will be a debate on three controversial topics in the diagnosis and treatment of adolescent achalasia, and is appropriate for all pediatric and adult surgeons and gastroenterologists actively engaged in the treatment of patients < 18 years of age with achalasia.

**SESSION OBJECTIVES**
At the conclusion of this session, participants will be able to:
- Understand high resolution manometry reports and categorize achalasia into distinct subtypes
- Articulate the advantages and disadvantages of a fundoplication in combination with a Heller myotomy
- Identify appropriate adolescent candidates for peroral endoscopic myotomy (POEM)
- Recognize limitations of the available literature to guide achalasia treatment in adolescent patients

**Plenary Session 1**

**Presidential Address – “A SAGES Magical Mystery Tour”**

*Speaker: L. Michael Brunt, MD*

Dr. Brunt is Professor of Surgery and Section Chief of Minimally Invasive Surgery at the Washington University School of Medicine in St. Louis, Missouri. He also directs the MIS Clinical Fellowship and the Washington University Institute for Minimally Invasive Surgery. His clinical and research interests are in outcomes studies in laparoscopic surgery, sports hernias, and surgical education. Dr. Brunt is a past Treasurer of SAGES and has been on the Executive Committee for the past 5 years. He also serves on the editorial boards of *Annals of Surgery*, *Surgical Endoscopy* and *Journal of Laparoscopic and Advanced Surgical Techniques*. Dr. Brunt has received the Distinguished Clinician Award from Washington University and the Philip J. Wolfson Outstanding Teaching Award from the Association for Surgical Education. He has for several years been listed in the Best Doctors in America and in the Guide to America’s Top Surgeons.

**SESSION DESCRIPTION**
This presentation will review some of the sentinel events in the life of SAGES and how those events helped shape the future direction of our society. Current SAGES initiatives and priorities will also be presented.

**SESSION OBJECTIVES**
At the conclusion of this session, participants will be able to:
- Identify sentinel events in the growth and development of SAGES and recognize how these have helped shaped the direction of the society over the years
- Discuss current initiatives and priorities for the society and surgeons in practice
Friday, April 17, 2015

10:45AM - 11:30AM

**Gerald Marks Lecture**

**Speaker: Frank R. Lewis, Jr., MD**

Dr. Lewis has been the Executive Director of the American Board of Surgery since 2002. Prior to the ABS, Dr. Lewis was chair of the department of surgery at Henry Ford Hospital in Detroit and professor of surgery at Case Western Reserve University. Dr. Lewis is a past chair of the ABS and the Residency Review Committee for Surgery of the ACGME. He is also a past president of the American Association for the Surgery of Trauma and the Shock Society. He has also served as first vice-president of the American College of Surgeons (ACS), as well as chair of the ACS Board of Governors. Dr. Lewis' clinical interests center on trauma and critical care. He is certified by the ABS in general surgery.

11:30AM - 12:30PM

**Scientific Session / Concurrent Sessions**

**Accepted Oral & Video Presentations**

**Debate: Presidential Debates**

**Chair: Christopher Schlachta, MD; Co-Chair: Jo Buyske, MD**

**SESSION DESCRIPTION**

For all SAGES members, the SAGES Presidential Debates are simultaneously serious and hilarious. In this year's debates, the audience will choose from topics that represent major challenges facing surgeons and the healthcare system. SAGES leaders will practically and philosophically address their audience assigned viewpoint, with no advance preparation!

**SESSION OBJECTIVES**

At the conclusion of this session, participants will be able to:

- Evaluate challenges facing healthcare quality in 2015 and the near future
- Recognize the impact that technology is having on the delivery of healthcare
- Assess strategies for embracing and mitigating these challenges from the standpoint of experienced surgical leadership

Military Surgical Symposium
Chair: LTC(P) Robert Lim, MD; Co-Chair: Gordon Wisbach, MD
Note: This is not an official Department of Defense event.

SESSION DESCRIPTION
The intent of this conference is to provide a forum for the presentation and discussion of current and ongoing military and military-relevant research, as well as educational topics of relevance to the military surgical community. Both civilian and military experts from various fields will present their ideas and lessons on surgical care in order to foster the continued interaction and exchange of ideas between the civilian and military medical communities.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Identify and address specific care issues related to combat surgical care and improve patient survival rates.
• Recognize the specific care issues related to austere environment surgical care.
• Integrate surgical advancements learned from the battlefield surgical care into garrison practice and improve patient safety.

Chair: Daniel Scott, MD; Co-Chair: Rebecca Minter, MD

SESSION DESCRIPTION
The luncheon is dedicated to fellowship program directors and surgical educators who are interested in learning more about evolving discussions regarding advanced surgical education. There is rising interest to explore new models for surgical residency training, with consideration of an integrated pathway to obtain core surgical training over a four year period followed by two additional years of specialty training. The Fellowship Council has grown considerably since its inception in 1997; the latest Fellowship Council match included 236 applicants for 174 positions at 139 programs. Standards and curricula have been developed for these fellowships, which may play a role in future advanced surgical training models. During this session, recognized experts in surgical education will lead a discussion regarding their vision of what this future training paradigm may look like, and how existing fellowships would be potentially integrated.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Describe the current state and associated gaps in General Surgery training
• Articulate an alternate model of General Surgery residency training which will allow for integration of fellowships in the final years of residency training
• Delineate the hurdles to making this paradigm shift in training, and discuss strategies for addressing these challenges to implementation

2:00PM - 3:30PM

Scientific Session / Concurrent Sessions

Panel: Acute Care Session – *Maximizing Patient Care in Emergency General Surgery (joint with AAST)*

Chair: Gregory Dakin, MD; Co-Chair: Jonathan Dort, MD

**SESSION DESCRIPTION**

This session is intended for all general surgeons and trainees who are involved with the care of surgery patients in the emergency setting. It will provide an opportunity to discuss the safe use of minimally invasive approaches to common general surgery emergencies, as well as tips and tricks for success in the operating room.

**SESSION OBJECTIVES**

At the conclusion of this session, participants will be able to:

- Describe current management of common general surgery emergencies and apply minimally invasive techniques when appropriate in their own practice
- Recognize the indications for minimally invasive approaches in sick patients
- Apply surgical tips and tricks for difficult situations in the operating room for common general surgery emergencies

Symposium: SAGES SMART™ Program

Chair: Liane Feldman, MD; Co-Chair: Thomas Aloia, MD

**SESSION DESCRIPTION**

This session is for physicians, surgeons, and midlevel providers and is aimed to introduce the concept of enhanced recovery and prehabilitation and to update the audience on the current state of the art in these arenas.

**SESSION OBJECTIVES**

At the conclusion of this session, participants will be able to:

- Identify the components of enhanced recovery and prehabilitation
- Prepare an implementation strategy for ER and PH in their home environment
- Evaluate peer reviewed literature regarding outcomes related to ER and PH programs

**Refreshment Break / Happy ½ Hour in Exhibit Hall**

3:30PM - 5:30PM

**Session: Emerging Technology**

**Chair:** J. Stephen Scott, MD; **Co-Chair:** Daniel Scott, MD

*Non-CME Activity*

**SESSION DESCRIPTION**

Once again SAGES, as part of the SAGES Technology Initiative, will present the Emerging Technology Session. Surgeons, physicians, scientists from academic centers as well as industry are invited to submit abstracts for consideration. Submissions that reflect “late breaking”, “cutting-edge” or novel information are greatly encouraged. Submission of preliminary results for new technologies is encouraged as well.

3:30PM - 5:30PM

**Resident/Fellow Scientific Session**

**Chair:** Linda Zhang, MD; **Co-Chair:** Iswanto Sucandy, MD

**SESSION DESCRIPTION**

In this session, residents and fellows will present their clinical and basic science research to a panel of prominent faculties who are respected in the fields of minimally invasive / bariatric surgery, flexible gastrointestinal endoscopy, and surgical education. After each presentation, panelists will rank each speaker with regard to study contents, significance, originality, methodology/design, result analysis/interpretation, appropriate use of statistical tests, and overall presentation skills. Awards will be given to the top two presenters at the conclusion of the session.

**SESSION OBJECTIVES**

At the conclusion of this session, participants will be able to:

- Identify and discuss challenges and pitfalls in research design, methodology, critical review of results and potential bias.
- Discuss potential solutions for the challenges and pitfalls in order to improve future study.
- Identify potential study topics related to the presented subjects that are feasible by surgical residents and fellow during their clinical training or dedicated lab time.
- Acquire an appreciation for the depth, breadth and importance of research conducted by surgical residents and fellows for trainee academic developments, as well as contributions to the science of surgery.
- Recognize optimum preparation and communication skills to deliver concise 10 minute presentation.

**Expert Panelists:** Brent Matthews, MD; Mark Talamini, MD; Aurora Pryor, MD; Lee Swanstrom, MD; Jo Buyske, MD
Panel: Complex Paraesophageal Hernias
Chair: Dana Telem, MD; Co-Chair: Edward Auyang, MD

SESSION DESCRIPTION
This session is designed for attending surgeons, residents and medical students who perform or have an interest in foregut, minimally invasive and bariatric surgery. The purpose of this session will be to highlight complex technical and perioperative considerations in the repair of paraesophageal hernia.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:

- Employ techniques (gastric reduction, hialtal closure, obtaining intra-abdominal length, etc.) to decrease recurrence
- Use flexible endoscopy in the acute and elective settings for evaluation pre-, intra-, and post-operatively
- Recognize and assess patients with systemic complaints post-operatively and apply techniques for revisional operations
- Understand perioperative considerations in patients with paraesophageal hernia.
- Be familiar with the current data surrounding use of mesh and performance of fundoplication.
- Recognize complex technical considerations involved in paraesophageal hernia repair including use of endoscopy, esophageal lengthening, difficulty with hialtal closure and re-operative procedures.

Panel: Lessons Learned from Military Surgery – Transition Back into Practice
Chair: Michael Ujiki, MD; Co-Chair: Yong Choi, MD

SESSION DESCRIPTION
Military surgeons have extensive experience in situations from which many lessons can be learned in order to improve civilian practice. For example, the civilian general surgeon would benefit from lessons learned in the use of laparoscopy in trauma, tele consultation, simulation, and patient evacuation and transfer to tertiary centers.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:

- Articulate the indications for the use of laparoscopy in trauma
- Distinguish various techniques for abdominal wall reconstruction
- Convey how to best transition from military to civilian practice
- Illustrate various methods of and uses for teleconsultation in surgery and medicine
- Apply various methods of simulation in surgical training
- Plan how to best triage and transfer patients to a tertiary trauma setting

Panel: Simulation and Telerobotics - Partnering with the Military
Chair: Mehran Anvari, MD; Co-Chair: John Paige, MD

SESSION DESCRIPTION
This session partners with military and space scientist to explore the new frontiers in use of simulation and avatars for training, use of modeling and 3D printing in developing tools and use of automation and artificial intelligence in the area of robotics and telerobotic interventions.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Compare current use of simulation in training with new approaches such as the use of avatars in military training
• Recognize the potential value of automation and artificial intelligence with use of robotic and telerobotic surgery
• Appraise the possibility of new modeling technologies and 3D printing in developing and testing new surgical tools and approaches

Scientific Session: Video Shorts (Top Videos)
Chair: Dean Mikami, MD; Co-Chair: Elisabeth McLemore, MD

SESSION DESCRIPTION
This session will be composed of top short surgical videos on various topics. The videos will be under 5 minutes long with allotted one question after each presentation. The video shorts will also be in the exhibit hall in on most days.

SESSION OBJECTIVE
At the conclusion of this session, participants will be able to:
• Implement some of the key points that the presenter outlined in their video
• Recognize a few of the key issues in other specialties besides their own
• Be able to recommend treatment options or be able to identify when to refer out a specialty or difficult case

9:30AM - 11:30AM  *Included in Registration SuperPass (Option A) or Registration Option C

Plenary Session 2

To fully comply with ACCME regulations, all SAGES Meeting attendees must have their badge scanned before entering any course or session room in order to receive CME credit for that event.

12:15PM - 1:30PM *Lunch: Separate Fee Applies

**Lectures: Included in Registration SuperPass (Option A) or Registration Option C**

**Advocacy Luncheon “Advocacy Boot Camp”**
Chair: Ross Goldberg, MD; Co-Chair: Don Selzer, MD

**SESSION DESCRIPTION**
As the debate over health care reform continues, surgeons are starting to realize the importance of their role in the political process, but they still do not know how to engage in that process. Surgeons need to learn how easy it is to engage the political process, and that a small investment of time can pay large dividends.

**SESSION OBJECTIVES**
At the conclusion of this session, participants will be able to:
- Identify the issues that require surgical political advocacy and input
- Demonstrate the techniques needed to be a successful political advocate
- Implement the changes into their surgical practice to allow inclusion of political advocacy

Session: Top 21 Video - Expecting the Unexpected
Chair: Kenric Murayama, MD; Co-Chair: Archana Ramaswamy, MD

SESSION DESCRIPTION
The session will have video presentations of unexpected operative events for 10 of the SAGES TOP 21 videos. Presenters will review 3-4 unexpected intraoperative events that occur during the normal course of the operations. The session should be attended by all surgeons and surgical trainees performing or interested in learning advanced minimally invasive techniques.

SESSION OBJECTIVES:
At the conclusion of this session, participants will be able to:
• Manage unexpected situations in the operating room that occur during the course of one of the 10 laparoscopic operations presented
• Identify equipment necessary to manage these unexpected situations
• Apply these skills to relevant cases in practice

Panel: Building and Optimizing A Surgical Practice
Chair: Brian Jacob, MD; Co-Chair: Josh Roller, MD

SESSION DESCRIPTION
This session provides the tools for successfully building a practice and reputation in both the private and academic institution environments. It addresses finding a new job, how to negotiate a contract, master face-to-face and online networking, trust building, and how to set yourself up for promotion and career advancement. We will also discuss how to implement successful marketing strategies, how to integrate mid-levels providers into a surgical practice, and how a surgeon can maximize efficiency within the hospital setting. Any resident, fellow, or surgeon interested in this should attend.

SESSION OBJECTIVES:
At the conclusion of this session, participants will be able to:
• State the most valuable attributes required to begin and grow a successful new practice
• Describe the importance marketing and social networking for professional growth
• Effectively identify and negotiate a new academic or private practice position
• Describe to how successfully integrate mid-level providers into a surgical practice
• Describe strategies to maximize a surgeon's productivity while in the hospital and avoid surgeon and family burnout

Panel: Quality Practices in Surgical Education and Training
Chair: Michael Awad, MD; Co-Chair: James Bittner, MD

SESSION DESCRIPTION
This session will focus on several key concepts that are changing the landscape of surgical education delivery and assessment. A series of three lectures on topics that include assessing and comparing quality in surgical education, defining best practices in surgical simulation, understanding early specialization and how it differs from the current training model, and measuring competency by implementation of the Fundamentals of Endoscopic Surgery program. These didactics will be followed by a panel session of expert surgical educators. Individuals interested in or participating in surgical education are encouraged to attend.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Appreciate methods to define and measure quality in surgical education
• Identify best practices in simulation-based training as it relates to minimally invasive and endoscopic surgery
• Understand the role of early specialization in the changing paradigm of surgical education and its relationship to quality initiatives
• Recognize the role of the Fundamentals of Endoscopic Surgery program in assuring basic clinical competency

High School Rep/Top Gun for Kids: Elliott Powers

SAGES does not offer CME for this session
Building on success of previous years, high school students from the Nashville area and SAGES membership will have the opportunity to experience the wonderful world of medicine and minimally invasive surgery. With projected physician and surgeon shortages in the future, this program is timely and hopefully will promote early decisions to join our noble profession. The day is power packed with expanded hands-on skill lab, and the Top Gun Interactive Experience. Both cognitive and skill competitions with awards and prizes will be offered. So do not delay in contacting SAGES for more information because space is limited.

The SAGES Mini Med School is designed to expose high school students to the field of Surgery through hands-on experience and simulation. Students will begin to appreciate that being in the OR is rewarding, important work, and fun. To maximize exposure, real life surgeons/volunteers will mentor the students throughout the program.

The Mini Med School Experience is a power packed extravaganza that provides “fun with a purpose”. Students will get the opportunity to show that they have the “right stuff” to join the ranks of physicians and laparoscopic surgeons. From video games that help decrease errors, to robots, to FLS and Top Gun surgical simulation drills. Make sure you do not miss this one of its kind opportunity.

Program limited to 100 high school students. Letter of recommendation from a high school teacher is required. Application is available online at http://www.sages2015.org/program-registration/mini-med-school/
SAGES Emerging Technology Session

Call for Abstracts

SUBMISSION DEADLINE: January 23, 2015

All abstracts for this session MUST BE SUBMITTED ONLINE.

Please visit http://www.sages.org/meetings/abstracts/ for instructions.

You are invited to submit papers to the “Emerging Technology” session to be held during the 2015 SAGES Annual Meeting. The meeting will be held April 15-18 in Nashville, TN.

This category of abstract is open to both physicians and industry engineers / scientists / researchers. It should be used for reporting on cutting edge or emerging technologies for which formal experimental data may not yet be available. Developers and inventors are encouraged to present their own work.

IF YOU ARE PLANNING TO SUBMIT OR DISCUSS ANY IDEAS OR INVENTIONS, before you submit or discuss them, please keep in mind that discussing or displaying them at this meeting may be considered a public disclosure of the idea or invention, which can negatively affect your right to protect that idea or invention. You may also have duties to your employer relating to that idea or invention, and should discuss the impact of a disclosure with the proper representatives of your employer before you submit or discuss it.

Abstracts will be accepted until January 23, 2015 and will undergo an expedited review process. This session is appropriate for technologies that may still be under development. Since the Emerging Technology session will not include CME credit, topics are not limited to formal studies or experiments but may include description based abstracts or very preliminary results. Presentations will be 5 to 10 minutes in length. Accepted abstracts will be published in the official SAGES Final Program to be distributed onsite.

Submissions should follow the following format:

1. Objective of the technology or device
2. Description of the technology and method of its use or application
3. Preliminary results if available

All abstracts for this session MUST BE SUBMITTED ONLINE. Please visit http://www.sages.org/meetings/abstracts/ for instructions.

If you have any questions, please contact the SAGES office at 310-437-0544 • FAX: 310-437-0585 or email: abstracts@sages.org.

Sincerely,

J. Stephen Scott, MD – 2015 Emerging Technology Chair
Daniel Scott, MD – 2015 Emerging Technology Co-Chair
SAGES TOP 21 PROCEDURES EVERY PRACTICING SURGEON SHOULD KNOW

SAGES Top 21 contains video-based training on the most common minimally invasive procedures performed by general surgeons, as determined by the SAGES Educational Resources Committee. Purchase of DVD also includes online access to content.

1. Upper Endoscopy
2. Colonoscopy
3. Laparoscopic Cholecystectomy
4. Laparoscopic CBD (Common Bile Duct)
5. Laparoscopic Nissen Fundoplication
6. Laparoscopic Paraesophageal Hernia Repair
7. Laparoscopic Heller Myotomy
8. Laparoscopic Inguinal Hernia Repair
9. Laparoscopic Ventral Hernia Repair
10. Laparoscopic Adrenalectomy
11. Laparoscopic Splenectomy

Coming Soon!
- Laparoscopic Right Hemicolectomy & Appendectomy
- Laparoscopic Sigmoid Colectomy/Low Anterior Resection
- Laparoscopic Roux-en-Y Gastric Bypass
- Laparoscopic Adjustable Gastric Band
- Laparoscopic Ultrasound
- Laparoscopic Distal Pancreactectomy
- Laparoscopic Liver Biopsy and Resection
- Laparoscopic Esophagectomy
- Laparoscopic Gastric Resection
- Laparoscopic Laparoscopic Treatment Of Pepsis Ulcer Disease

SAGES PEARLS SERIES

SAGES Pearls provide step-by-step instruction by one or more expert laparoscopic surgeons on the following topics. The content also includes specially-prepared commentaries.

- Laparoscopic Nissen Fundoplication MS1109
- Laparoscopic Roux-en-Y Gastric Bypass MS1110
- Laparoscopic Sigmoid Colectomy MS1111
- Laparoscopic Right Hemicolectomy MS1112
- Laparoscopic Inguinal Hernia Repair MS1214
- Laparoscopic Incisional Hernia Repair MS1215

SAGES PATIENT INFORMATION BROCHURES

Patient information brochures developed by The SAGES Educational Resources Committee assist surgeons in preparing their patients for surgery. Brochures are 8 pages and feature full color illustrations. Patient information brochures are available for the following topics:

- Colonoscopy
- Upper Endoscopy
- Flexible Sigmoidoscopy
- Laparoscopic Spine Surgery
- Diagnostic Laparoscopy
- ERCP
- Laparoscopic Anti-Reflux Surgery
- Laparoscopic Colon Resection
- Laparoscopic Inguinal Hernia Repair
- Laparoscopic Surgery for Severe Obesity
- Laparoscopic Ventral Hernia Repair
- Laparoscopic Adrenal Gland Removal
- Laparoscopic Gall Bladder Removal
- Laparoscopic Spleen Removal
- Laparoscopic Appendectomy

*Discount available for purchasing 150 or more.

Order Today! Call 800.515.1542 or 203.263.0006 or Visit Our Website at: www.Cine-Med.com
Did you know that the American Board of Surgery requires 60 Category 1 CME Credits from a self assessment activity every 3 years for Maintenance of Certification (MOC)?

Get your self assessment credit from SAGES today:
- SAGES University (university.sages.org)
- SAGES Annual Meeting (www.sages2015.org)
- Fundamentals of Laparoscopic Surgery™ (http://www.flsprogram.org/)
- Fundamentals of Endoscopic Surgery (http://www.fesprogram.org/)
- Fundamental Use of Surgical Energy™ (http://www.fuseprogram.org/)
1. Top Gun
Coordinator: James “Butch” Rosser, MD
The Top Gun Laparoscopic Skill Shootout Station will allow participants of all levels of training to develop and improve their laparoscopic skills. The station will feature the validated “Rosser TOP GUN” skill development stations developed by Dr. Rosser and made famous at Yale. To date, over 6000 surgeons have participated around the world. Instructors will show tactics and techniques that will transfer readily into the clinical environment. In addition, participants will be completing for slots in the Top Gun Shoot Out that will crown one SAGES 2015 TOP GUN.

Objectives:
At the conclusion of this activity, the participant will be able to:
- Review the Rosser suturing algorithm
- Perform dexterity skills and suturing exercises using the “Rosser TOP GUN” training stations
- Compete with other surgeons in the Top Gun Shoot Out

2. Fundamentals of Laparoscopic Surgery™ (FLS), 2.0/VR Simulation
Coordinator: Caitlin Halbert, DO
Fundamentals of Laparoscopic Surgery™ is a joint program of SAGES and ACS which is now required for board certification of general surgery residents. It was designed to teach physiology, fundamental knowledge, and technical skills that are required for competency in laparoscopic surgery. This station will introduce participants to the FLS technical tasks, as well as innovative Virtual Reality simulator (VBLAST) which has been designed to replicate these tasks in a virtual environment. The web-based content of FLS 2.0 (updated recently with fresh material) will be available to participants as well.

Objectives:
At the conclusion of this activity participants will be able to:
- Describe the components of the FLS 2.0 program
- Explain the preoperative, intraoperative, and postoperative considerations fundamental to laparoscopic surgery
- Have exposure to the technical tasks involved
- Have exposure to the tasks in an innovative Virtual Reality environment
- Have real-time feedback on their performance (including the completion time and the accuracy of their movements).
- Compare the VBLaST system to the physical FLS trainer.

3. Fundamentals of Endoscopic Surgery™ (FES)
Coordinator: Jonathan Pearl, MD
Flexible Endoscopy continues to be an important component to a General Surgeons practice. Endoscopy requirements in residency training have increased over the past few years and simulation training will soon be a requirement. This station will showcase the newly developed Flexible Endoscopy training models. These models allow training in scope navigation, tissue targeting, retroflexion and loop reduction. The models are simple to make and can easily be adopted in a residency training curriculum. This station will also allow the user to utilize a virtual reality simulator for both upper and lower endoscopy.

Objectives:
At the conclusion of this activity, the participant will be able to:
- Practice valuable endoscopic skills in a reproducible model
- Perform various endoscopic tasks in a virtual reality simulator
- Evaluate the SAGES endoscopic curriculum

4. Fundamental Use of Surgical Energy™ (FUSE)
Coordinator: Thomas Robinson, MD
SAGES has developed a curriculum to help with the understanding and safe use of energy devices in the operating room. This learning station will allow the user to review the science and safety behind monopolar, bipolar and ultrasonic energy devices. Participants will utilize the VEST simulator, which will introduce learners to the basic electrocautery tasks in surgery within a high fidelity virtual reality environment using both monopolar and bipolar electrocautery tools.

Objectives:
At the conclusion of this activity, the participant should be able to:
- Appreciate the difficulties related to the use of the electrocautery tools.
- Learn the proper technique in performing electrocautery tasks safely
- Perform different energy-based tasks within a simulated scenario using both monopolar and bipolar electrocautery tools.
- Describe the physics behind common energy devices in the operating room
- Evaluate the SAGES FUSE curriculum

5. Minimal Access Surgery
Coordinator: David Renton, MD
Minimal Access Surgery includes single port surgery which is an alternative to multiple port laparoscopic surgery. There are multiple methods to gain entry into the abdominal cavity and multiple techniques to perform the operations. At this station, the user will be able to use the multiple access ports commercially available. The user will also be able to use both straight and articulating instruments to perform various tasks, including suturing on an inanimate trainer. In addition, there will be other options for the use of smaller than 5 mm instruments.

Objectives:
At the conclusion of this activity, the participant will be able to:
- Utilize other minimal access options
- Perform various laparoscopic tasks such as suturing and running bowel
- Compare Single Port surgery to traditional laparoscopic surgery
- Insert various types of Single Port Access devises
6. IPEG Education

**Coordinators:** Katherine Barsness, George Azzie, MD and Go Miyano, MD

1. **Target audience:** In-training and practicing surgeons from any field of surgery

2. These stations will introduce a variety of emerging educational tools for basic and advanced surgical techniques unique to pediatric surgical procedures, including neonatal laparoscopy and thoracoscopy for congenital anomalies, laparoscopic pyloromyotomy, and a variety of task trainers. Participants will also learn more about, and be eligible to participate in research on, computer vision and machine learning for surgical performance assessment.

3. **Learning objectives:** At the conclusion of this activity, learners will be able to
   a. Describe the unique tasks associated with pediatric surgical patients
   b. Have technical exposure to key procedural steps of a minimally invasive operation for a congenital anomaly
   c. Determine the relevance and realism of a novel educational device for neonatal minimally invasive surgery

7. Laparoscopic Common Bile Duct Exploration

**Coordinator:** Fernando Santos, MD

Laparoscopic common bile duct exploration is a surgical technique that allows the common bile duct to be cleared of biliary stones without the need for open or endoscopic procedures. At this station participants will learn the available techniques used for laparoscopic bile duct exploration.

**Objectives:**
At the conclusion of this activity, the participant should be able to:
- Practice the techniques available for cannulating the common bile duct
- Practice various techniques for clearing the common bile duct of stones
- Interpret intraop cholangiogram to identify obstructing stones

8. Video Learning Station

**Coordinator:** Laura Doyon, MD

Video Learning is playing an increasing role in the education for surgeons. With increasing variety of procedures being done using minimally invasive techniques, there is increasing opportunity to use video for educational purposes. This station will be designed to provide topic specific education using videos in the SAGES archives. Top videos from the archives addressing the topics of Bariatric surgery, Foregut surgery, and Hernia surgery will be chosen and available to participants to learn operative techniques.

**Objectives:**
At the conclusion of this activity participants will be able to:
- Describe operative strategies pertinent to hernia and biliary surgery—focus on complex cases and complications
- Describe operative strategies for bariatric surgery— including primary operations and revisions
- Describe operative strategies for foregut surgery— including primary operations and revisions

9. Hernia Station

**Coordinators:** Philip Omotosho, MD and Dr. Igor Belyansky, MD

The SAGES inguinal hernia education program was designed to evaluate the fundamental knowledge, decision-making, and comprehensive management strategies utilized in caring for the patient with an inguinal hernia.

Via a simulated platform (DecisionSim™), participants will navigate pre-operative, intra-operative, and post-operative phases of care for a virtual patient with an inguinal hernia.

**Objectives:**
At the conclusion of activity the learner will be able to:
- Navigate the station contents through web-based interface
- Identify and manage the inguinal hernia patient
- Describe and apply appropriate operative technique and strategies in the inguinal hernia patient
- Identify and manage factors that may lead to recurrent hernia
- Develop a management plan for the post operative inguinal hernia patient with a suspected recurrent hernia
- Describe and apply appropriate operative technique in patients with a recurrent hernia
- Describe a plan for continuous quality improvement in the prevention and management of recurrence in the inguinal hernia patient

<td>SAGES Grand Rounds Master Series</td>
<td>Offers video, slide presentations, discussion and in depth education. The SAGES Educational Resources Committee has developed these patient information brochures to assist surgeons in preparing their patients for surgery. Given the variations in technique, SAGES has designed these handouts to describe the most commonly performed techniques.</td>

SAGES Manuals

The SAGES Manuals are portable, concise, beautifully illustrated manuals from the world’s pioneering society of minimally invasive surgery.

Forthcoming SAGES Manuals:

- The SAGES Manual Operating Through the Endoscope
  Kroh, Reavis (Eds.)

- The SAGES Manual of Groin Pain
  Jacob, Chen, Ramshaw, Towfigh (Eds.)

- The SAGES / ERAS Manual of Enhanced Recovery Programs for Gastrointestinal Surgery
  Feldman, Delaney, Ljungqvist, Carli (Eds.)
SAGES attendees can register and attend any portion of the IPEG Scientific Sessions for $150. To register, refer to page 69 and check the IPEG crossover option box. Visit ipeg.org/meeting for additional details of their program.

**Tuesday, April 14, 2015 – Pre Meeting Course:**
Postgraduate Lecture: MIS in Infants and Neonates

**Wednesday, April 15, 2015 – Hands On Labs (Non CME):**
- Critical and Technical Skills for Neonatal and Infant MIS Surgery
- Parallel High Fidelity Simulation
- Innovations in Simulation
- **Joint IPEG/SAGES Opening Ceremony/Welcome Reception**

**Thursday, April 16, 2015**
- Scientific Video Session I: Coolest Tricks, Extraordinary Procedures
- Welcome Address
- Scientific Session: Gastrointestinal
- Presidential Address & Lecture
- Expert Panel: Bridging the Education Gap with New Innovations
- **Poster Presentation of Top 1-20 Posters of Distinction**
- Scientific Session: Single Site Surgery
- Scientific Session: Basic Science and Innovations
- **Joint Session SAGES/IPEG Adolescent Bariatrics**
- SAGES Karl Storz Lecture
- Innovation Session (non-CME)

**Friday, April 17, 2015**
- Joint Session IPEG/SAGES – Adolescent Achalasia: The Great Debate
- Scientific Video Session II
- Scientific Session: Urogenital
- Scientific Session: Gastrointestinal, Colorectal & Hepatobiliary II
- **Poster Presentation of Top 21-40 Posters of Distinction**
- **Keynote Lecture**
- Expert Panel: The Art, Science, and Ethics of Innovation
- Expert Panel: “What’s New in Pediatric MIS?”
- Scientific Session: Thorax
- **Friday Night Sing Off/Main Event – Joint SAGES/IPEG event**

**Saturday, April 18, 2015**
- Miscellaneous – Short Oral Papers
- **General Assembly – Presentation of the IPEG 2016 President**
- **Awards** – Coolest Tricks, Basic Science/Innovation, and IRCAD
- Video Session with Expert Panel Discussion “My Worst Nightmare” The Management of Unusual Complications, and Strategies for Future Avoidance
- Box lunch and Closing Remarks
Registration & Hotel Reservation Instructions

Hotel Reservations
Please book your hotel rooms within the SAGES Hotel Block!

We have contracted 2 hotels for you to choose what suits your preference.

The quickest and easiest way to reserve a hotel room for SAGES is on-line at
If you require additional assistance, please call 310-437-0544 x128

Reservations Prior to the Deadline:
Rooms are available on a first-come, first-serve basis!

Reservations After the Housing Deadline:
Rooms and rates are not guaranteed and are subject to availability. See our online housing page for latest info.

Shuttles:
Shuttle service will be provided from the hotel to social events not within walking distance.

Hotel Changes and Cancellations:
Any changes or cancellations are available through the online reservation page. Look for the “Already Have a Reservation” link. Cancellation of hotel reservations made less than 14 days prior to your scheduled arrival is subject to $50 cancellation fee and beyond that may result in a one-night room and tax charge to your credit card. Check your hotel confirmation letter for individual hotel policy.

Suites:
Please contact the Headquarters Hotel directly to inquire about rates and availability. Toll free 877-491-7397 or intl dial 1-615-889-1000.

Ways to Book Your Hotel Room:
All attendees are responsible for their own hotel reservation.
- Book online at: http://www.sages2015.org/travel-information/hotel/
- Phone toll free 877-491-7397
- call SAGES Registrar 1-310-437-0544 x128

Date: Friday, April 17, 2015
Place: 120 2nd Ave N, Nashville, TN 37201
Time: 7:30 - 11:00 PM
Dress: Fun-Casual, wear dancing shoes
Fee: Included in Registration for SAGES Super Pass (Option A), & registered guests.
Tickets: $125.00 (for additional guests and SAGES Registration Options B & C)

Shuttle Service will be provided to and from the Opryland Hotel – Delta Portico entrance.
The Wildhorse Saloon is a country/western-themed restaurant, live music venue, and dance club located in downtown Nashville, Tennessee. Originally opened on June 1, 1994 in a converted warehouse, the Wildhorse is famous for its open bar, large atrium, and permanent stage. The Wildhorse consists of three levels, the top two levels overlook the dance floor and stage. Join us for an unforgettable evening.

The evening will conclude with the 18th International Sing-Off!

Additional Activities

Please contact the concierge at the Gaylord Opryland Hotel (ph 1-615-889-1000) for more information and tickets on any of these activities:

• Grand Ole Opry Show (every Tuesday & Saturday at 7:00pm)
• Grand Ole Opry Backstage Tours (daily 9:00am-4:00pm)
• Ryman Auditorium Tours (daily 9:00am-4:00pm)
• General Jackson Showboat (call for schedule)
